Eco Explorers:

Discover the wonders under your feet! We'll be getting our hands dirty when we look into soil and erosion, have amazing bug races, watch butterflies hatch from their cocoons and more! Come prepared to get messy in this biology and earth science themed two-week camp.

Time Warp Wonders:

Spend a day in Ancient Rome where the Gladiators lived and every day people wore togas. One day Greek Gods will greet you as you travel to a time and place where Zeus ruled with an iron fist. Experience Egypt in days past as you make a mummy and containers for it's organs. Wrap up the week with one of the strongest and fiercest native Races from South of the border.

Lighten up Electronics:

Relax, laugh, and have a good time as we explore the world of Light, Energy, Electricity and Electronics in this FUN and interactive program. You will build circuits, turn on lights, make noise and perform fascinating electronic experiments. You will also learn to make various electronic components including a variety of switches. Did you know that you can Convert Fruit's chemical energy into electrical energy? There are many surprises in store at this illuminating camp!

Passport to Adventure:

You will need your Imaginarium passport (which you get at check in) to keep track of all your travels this week! We will hop across Oceans to visit countries in Asia, Europe, Africa, South America and more. Learn language, traditions, and even try some local food. Successful travelers will journey around the world hitting 6 different countries and ending up back home in Laredo in just a week. Bring your sense of adventure and come home with stories of cultures and people from far and wide.

Creation Station:

Are you a budding inventor - always coming up with a great new idea or taking things apart to see how they work? At this camp we encourage you to pull apart and put back together in new and exciting ways. Learn Creative Problem solving while tinkering with toys, recycled materials, and tiny motors. Build as an individual and also experience being on a design team as we invent and create to our heart's content.

Slimy Sleuths:

Dress for mess as we dig into chemistry in a way you will never forget. From Diet Coke & Mentos Geysers to Polymers that expand to 100 times their size, you will have a blast (literally) at this camp. The Mad Scientist in you is begging to get out, and this is the perfect chance!

Camp Rockasaurus:

Dinosaurs, fossils, rocks, volcanoes and more dinosaurs! Dig into a fossil excavation and explore the secrets of the dinosaurs. Discover who lived in Laredo back "in the day" of the great giants. On the last day, build a volcano and watch it erupt, then have a volcano ice cream sundae party!
